

CBS Southeast

A GROUP CBS COMPANY

THE GULF COAST'S #1 PROVIDER OF:

- New and used product inventory
- Replacement parts
- Cost-saving retrofit and retrofit inventory
- Advanced in-shop testing services*

*including magnetron atmospheric condition (MAC) field testing to predict the remaining life of your vacuum interrupters

CBS Southeast is the Gulf Coast's one-stop shop for low- and medium-voltage power distribution equipment sales, repair, and retrofit upgrades.

CBS SOUTHEAST provides sales and repair, upgrade, reconditioning, and life-extension services of utility/ industrial circuit breakers, motor controls, switchgear, substations, transformers, and other electrical equipment. Replacement parts are our specialty. Emergency service is available 24/7.

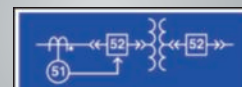

Additionally, we provide remote circuit breaker racking systems and remote switch operators and actuators to help ensure the safety of your electrical maintenance personnel.

Our complete range of shop services and thousands of new, surplus, and remanufactured electrical equipment and parts are available to support you 24 hours a day, 365 days a year.

Based in Gonzales, LA, CBS Southeast is prepared to serve the entire Gulf Coast Region.

To discuss your application, obtain pricing, or receive additional information, please contact us at 225-673-2278 or by email at info@CBSSoutheast.com.

SHOP SERVICES

Remanufacturing/Reconditioning/Repair

Depending on our customers' equipment needs, CBS Southeast provides a range of remanufacturing, reconditioning, and repair services for all types of electrical equipment. Our remanufacturing services include disassembly, visual and mechanical evaluation, component replacement or reconditioning, testing both before and after the remanufacturing process, all standard maintenance procedures as dictated by the OEM, and full documentation of test results and equipment performance after the remanufacturing process is completed. This ensures that your equipment will perform as well or better than it did when it rolled off the assembly line.

Life Extension/Retrofit/Retrofill

CBS Southeast's life-extension programs will extend the useful life of your obsolete switchgear, motor controls, and circuit breakers. This includes raising interrupting capacity, increasing equipment reliability, matching your existing switchgear lineup, providing solid-state trip units, and offering retrofit and retrofill solutions. We can help you get even more value out of your switchgear investments.

Our services include the ability to:

- Upgrade your low-voltage circuit breakers by retrofitting them with a solid-state trip unit.
- Replace low-voltage motor control buckets with our UL-listed replacement products.
- Retrofit large low-voltage motor controls with vacuum interrupters to extend their life.
- Replace your obsolete medium-voltage breaker and drawout cell assembly by installing our retrofill modules that will provide you with a new breaker and cell.
- Upgrade or replace your discontinued medium-voltage circuit breakers with vacuum roll-in replacements.
- Retrofit your obsolete medium-voltage air circuit breaker with a vacuum circuit breaker that has the same truck assembly.
- Provide a matching switchgear lineup to add feeders to an obsolete substation.

SALES

As a member of Group CBS, CBS Southeast offers the industry's largest inventory of **NEW** low- and medium-voltage equipment, **REPLACEMENT PARTS**, and **REMANUFACTURED** electrical equipment to keep your operation running. At CBS Southeast, we understand your critical need for quality and timely service. That's why we offer 24/7 emergency and non-emergency service to ensure that you're continually operating. Our staff of experienced breaker technicians is able to service breakers from all manufacturers, to your specifications, no matter the generation.

As one of the largest providers of parts for power distribution equipment in the Gulf Coast region, we carry relays, trip coils, current transformers, racking mechanism parts, and much more. No matter your need, CBS Southeast has you covered.
